CURRICULUM VITAE

KARSTEN SMITS

OVER MIJ

My name is Karsten Smits, I am 26 and live in Eindhoven, The Netherlands. In 2015 I graduated as a sound-designer on the Dutch Pop Academy in Utrecht, I started in 2016 at what was at that moment TNT. In March 2021 I started as a Service Assurance Specialist for FedEx (which took over TNT). In addition to my job, I follow a part-time HBO ICT study in the evenings to develop myself into a UI/UX designer.

I have been a huge music lover from a young age. Besides playing the piano I produce electronic music. I am eager to learn and always looking for a different way to make something better, more accessible or faster.

My education and job both require a high level of independence, I have been working from home since I started my current position and have had to learn everything by myself. My education mainly focuses on design and development, while my job leans more towards data analyst. I'm interested in both topics, but prefer to work in a position where I can express my creativity.

WORK EXPERIENCE

2021 heden

FedEx

Service Assurance Specialist, Benelux

Our Quality and Service Assurance department focuses on supporting our locations in the Benelux in achieving and maintaining Service Key Performance Indicators and Process Compliancy. I am mainly involved in analyzing data, visualizing the analyzed data, optimizing the process and making and giving presentations to different management layers within the organization. In addition to analytical and advisory tasks, I spend the rest of my time designing, building and maintaining dashboards.

2016 -2021
